Education

Florida Institute of Technology, Melbourne, FL

Bachelor of Science, Electrical Engineering

Expected December 2028

- Dean's Scholar (Fall 2025, Spring 2026)
- 3.88 GPA
- Treasurer, Florida Tech Surf Club
- Honors College Student
- Drone Club Member

Grassfield High School, Chesapeake, Virginia

Sept. 2021-May 2025

- National Honor Society
- 4.71 Final Weighted GPA
- CCPTA Volunteer of the Year Scholarship

Independent Projects

Two-Story Commercial Revit Electrical Design

June 2026 – Present

Autodesk Revit, Revit MEP, BIM, Three-Phase Distribution

- Developed the electrical model for a two-story commercial building, including first- and second-floor power plans, receptacle layouts, equipment placement, circuiting, and panel schedules.
- Completed LinkedIn Learning's **Cert Prep: Revit for Electrical Design Professional** course to strengthen BIM-based electrical design and documentation skills.

\$57.93 Micro FPV Toothpick Drone

May 2026 – June 2026

Betaflight, ExpressLRS, Electronics Assembly, 3D Printing, GitHub

- Developed the electrical model for a two-story commercial building, including power plans, receptacle layouts, equipment placement, circuiting, and panel schedules.
- Integrated an STM32F411-based flight controller, ELRS receiver, motors, FPV camera, video transmitter, and custom 3D-printed components.

Open-Source Window Cleaning Robot

December 2025 – Present

KiCad, Fusion 360, TI WEBENCH, ESP32-S3, PCB Design

- Developing an open-source, 3D-printable robot designed to adhere to vertical glass, rotate cleaning pads, detect window edges, and respond to remote commands.
- Designed the custom power, motor-control, sensor, and microcontroller PCB using KiCad and TI WEBENCH Power Designer.
